

CINS AGM 2010 "The Future of Neutron Scattering in Canada"

Co-hosted by the University of Saskatchewan and the Canadian Light Source

Oct. 15-17, 2010

Saskatoon, SK

The Canadian Institute for Neutron Scattering (CINS) is pleased to announce that this year's Annual General Meeting will be held in Saskatoon, SK and will be co-hosted by the University of Saskatchewan and the Canadian Light Source. The meeting is Oct. 15-17, 2010 and will include prominent speakers and a tour of the Canadian Light Source. The title of this year's meeting is "The Future of Neutron Scattering in Canada" and a major goal will be to raise the public profile of neutron scattering and discuss the business case for a new neutron source for Canada. In addition the local hosts and their partners will highlight to the CINS community the capability and enthusiasm of Saskatoon as a potential site for a new neutron source. CINS members are strongly encouraged to attend this exciting meeting and contribute to a scientific poster session showcasing their diverse interests and accomplishments.

Details to follow concerning the full program, travel assistance, and registration details at www.cins.ca.

Co-Chairs of the Organizing Committee:

Dr. Dominic Ryan, President of CINS and Professor of Physics, McGill University

Dr. Richard Florizone, Vice-President (Finance & Resources) University of Saskatchewan
